 - Up to 30 word subheadline
 - Up to 500 word article

HIMSS15 SPONSORED ARTICLES

Bridging the Gap Between Healthcare and Technology

A Pew Research study revealed that every seven out of 10 U.S. adults track their health data, and a growing number using digital health apps and devices; yet, only one in ten share that data with a clinician. This begs the question: in a world where consumers are compelled to share everything from thoughts on celebrity gossip to well-orchestrated videos of themselves being doused with buckets of ice water, do we actually have a sharing problem? Clearly not. What we have is a data access problem.

PREMIUM ARTICLE:

- Up to 600x400 image, displayed as 100x100 thumbnail on HIMSS16 News page
- Article slugged as Sponsored Content
 - Up to 80 character headline
 - Up to 30 word subheadline

Cerner/Siemens Mega-Deal: One Shared Client CIO Looks Ahead to 2015

December 30, 2014 Rajiv Leventhal

ARTICLE The Cerner/Siemens deal that was announced in August was immediately met with praise, but also uncertainty. A shared client CIO gives his take on what the deal now means for his health system as we move into the New Year.
